Negative Ion Portable Filtered Water Bottle

Pure, Negative Ion-Infused Water Anytime, Anywhere

Small
Molecular Water

Alkali element

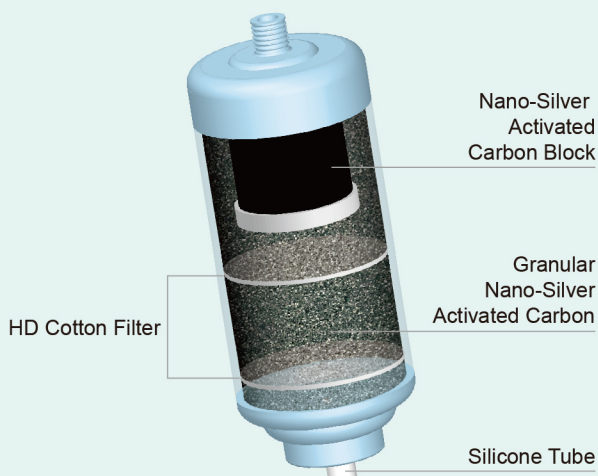

Far infrared

Negative ion

INSTRUCTIONS FOR USE

Introduction of Negative Ion energy filter cartridge

The Negative Ion filter cartridge can filter about 600 liters of tap water (limited to qualified tap water), which can last for 5-6 months (depending on local water quality and usage).

When suction becomes obstructed, check if the straw is stuck to the bottle bottom, if not, please replace the filter cartridge.

When water tastes funny or unpleasant, please replace the filter cartridge.

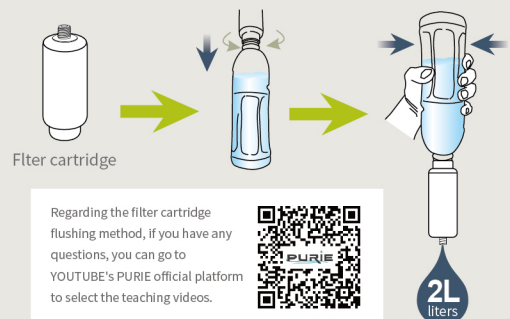

In order to maintain the quality of the filtered water, please change the filter cartridge regularly.

If left unused for more than two days, the filter cartridge should be removed, sealed in a clean bag and refrigerated. Before reusing, the cartridge should be rinsed with 1000 ml of water first.

Step 1

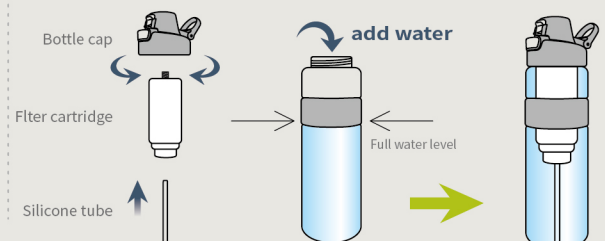

When firstly using (or replacing with a new cartridge), screw the filter cartridge onto the water-filled PET bottle. Squeeze the bottle to flush carbon fines until water is clear (repeatedly rinse with 2 liters of water).

Faucet Rinsing Method: Insert the silicone end of the cartridge into the faucet spout. Flush the cartridge until water comes out colorless.

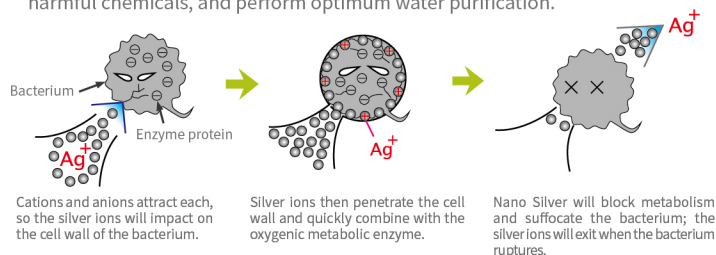

Step 2

Please connect the activated filter cartridge to the silicon tube(straw) and the bottle cap. Finish assembling, and the filtered water bottle is ready for use. Just fill up the bottle and drink.

Nano Silver Particle

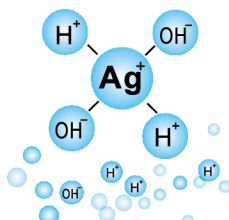

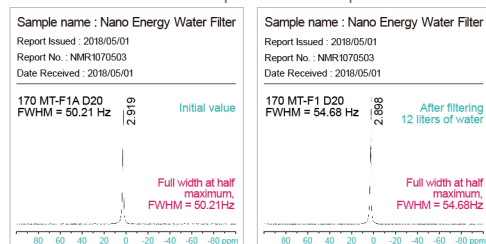

The Nano silver inhibits multiplication and growth of water-borne bacteria and microbes, absorb residues of pesticide, heavy metals, harmful chemicals, and perform optimum water purification.

Small Molecular Water

Easily absorbed by human body.

Small water particle test report

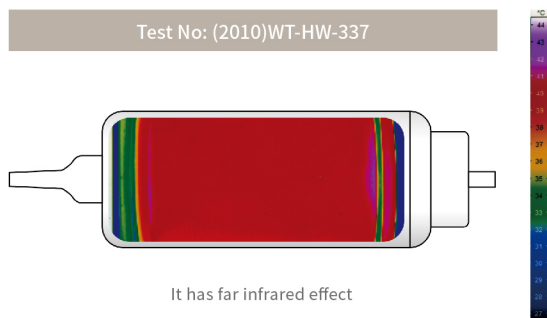

Far Infrared Function

The water passing through our filter has infrared functioning, which enables resonance with human cells to boost metabolism.

Test No: (2009)WT-HW-671

Test Item (Unit)	Test Standards	Test results	Individual assessment
Infrared emissivity	/	0.96	/
Firing rate to the whole law	≥ 0.80	0.87	Qualified

Test No: (2010)WT-HW-337

pH8 light alkaline water

Neutralize & rinse acidity inside human body to improve body quality.

Negative Ion Water

Benefits of anion: reduces bacteria and allergens, helps reduce free radicals in the blood, removes odors, and boosts immune system.

Test No: (2009)WT-HW-509

Test Item (Unit)	Test Standards	Test results	Individual assessment
Anion concentration (one/cm ³)	/	6750	/

SGS test report for reliable drinking

Report of Anti-bacterial test

SGS Test No: PX/2012/C004201

Test Item	Unit	Before Processing	After Processing
Coliform	CFU/100mL	6.3 x 10 ³	< 1

Report of heavy metals test

SGS Test No: PX/2013/4003401

Test Item	Unit	Before Processing	After Processing
Iron	mg/L	0.529	0.0052
Lead	mg/L	0.483	0.017

Report of Chlorine removal test

SGS Test No: PX/2013/4003401

Test Item	Unit	Before Processing	After Processing
Total Residual Chlorine	mg/L	0.31	0.04

Taiwan Patent Certificate – Utility Model No. M456220
China Utility Model Patent Certificate – ZL 2012 2 0717001.4

Product Specifications

Brand : PURiE
Model : MT-P1B
Product Name : Negative Ion Filter Water Bottle
Colors : Vibrant Red, Sky Blue, Apple Green, Cool Gray
Filter Housing : PP
Filter Operating Temperature : 0-40°C
Bottle Material : Eastman Tritan™ Modified PCT
Bottle Operating Temperature (empty) : 0-100°C
Sealing Ring, Logo Ring, Bottle Sleeve : Food-Grade Silicone
Package Contents : ▪ Negative Ion Filter Water Bottle x 1 set
▪ User Manual x 1
Country of Origin : Taiwan
Distributor : PURiE Nano Water Purification
Official Website : <https://www.puriewater.com>
